CMREBOP	BOP	240x140x1150	RE031BOP - RE042BOP - RE052BOP - RE062BOP

Material: Technopolymer

Use: Item that allows the connection between the inclined plane (pitch) and the vertical plane (wall). The wall connection flashing is made up of a smooth part, which must be supported and fixed to the wall, and a part that has 7 waves of the same pitch as the sheet.
The accessory must overlap the sheet to ensure the flow of water without the risk of infiltration.
